Retraction note to:

JBUON 2019; 24(2): 686-692; PMID: 31128024

Following the publication of this article [1], readers drew to our attention that part of the data was unreliable. Then the corresponding author contacted with our journal and stated below: Our paper was reported to have several duplicated images. We noticed that we prepared the images wrongly. The authors then asked to retract this article. At the same time, our journal's investigation into this article also showed that Figures in this article were manipulated. Given above, we decided to retract this article. All the authors were informed of the retraction. We thank the readers for bringing this matter to our attention. We apologize for any inconvenience it may cause.
