

EXPRESSION OF CONCERN

Antiproliferative activities of auraptenol against drugresistant human prostate carcinoma cells are mediated via programmed cell death, endogenous ROS production, and targeting the JNK/p38 MAPK signal pathways

Yunli Liu, Xuedong Li, Zhaoyan Chen, Yunhui Chan

Department of Urological Surgery, the second affiliated hospital of Harbin Medical University, Harbin, Heilongjiang, China, 150001.

Expression of concern to:

JBUON 2020;25(1):454-459; PMID: 32277668

Following the publication of this article [1], readers drew to our attention that part of the data was possibly unreliable. We sent emails to the authors with a request to provide the raw data to prove the originality, but received no reply. Therefore, as we continue to work through the issues raised, we advise readers to interpret the information presented in the article with due caution. We thank the readers for bringing this matter to our attention. We apologize for any inconvenience it may cause.
